

OAS-025 — Presence Architecture

Status: Foundational

Authority: Architectural

Depends on:

- OAS-000 through OAS-024
 - OCS-000 through OCS-032
-

Purpose

This specification defines the architectural organization of Presence.

Presence is the constitutional condition through which a Participant, Voice, or Place actively participates in the evolution of Understanding.

Presence is not connectivity.

Presence is not authentication.

Presence is not activity.

Presence is the architectural expression of meaningful constitutional engagement.

Architecture SHALL preserve Presence independently of communication technology or implementation mechanisms.

1. Architectural Objective

The objective of Presence Architecture is to preserve meaningful participation while distinguishing genuine constitutional engagement from mere availability.

Architecture SHALL preserve:

Participation.

Attention.

Context.

Intent.

Continuity.

Relationship.

Presence SHALL remain observable.

2. Definition

Architectural Presence is the current constitutional relationship between a Participant or Voice and one or more constitutional Places.

Presence MAY be:

Active.

Reflective.

Observational.

Collaborative.

Dormant.

Presence SHALL remain contextual.

3. Presence Independence

Presence SHALL remain independent of:

Network connection.

Authentication state.

Application session.

Device availability.

Implementation technology.

Presence SHALL describe constitutional engagement.

Not technical status.

4. Presence Relationships

Presence SHALL preserve explicit relationships with:

Places.

Voices.

Conversations.

Questions.

Learning.

Current architectural context.

Relationships SHALL remain reconstructable.

5. Presence Context

Every architectural Presence SHALL preserve:

Purpose.

Current focus.

Applicable context.

Relevant understanding.

Declared intent (when applicable).

Presence SHALL remain meaningful.

6. Presence Evolution

Presence MAY evolve continuously.

Evolution SHALL preserve:

Historical continuity.

Context transitions.

Relationship continuity.

Architectural explainability.

Presence evolution SHALL become constitutional history.

7. Presence Diversity

Multiple forms of Presence MAY coexist.

Examples include:

Listening.

Observing.

Contributing.

Reviewing.

Reflecting.

Stewarding.

Architecture SHALL recognize that meaningful Presence is not limited to visible activity.

8. Presence Memory

Architecture SHALL preserve:

Periods of participation.

Periods of reflection.

Major transitions.

Context evolution.

Contribution continuity.

Presence Memory SHALL support future understanding.

9. Presence Federation

A Voice MAY maintain Presence across multiple Places.

Federation SHALL preserve:

Local context.

Independent participation.

Architectural sovereignty.

Relationship continuity.

Presence SHALL remain locally meaningful.

10. Presence Verification

Verification SHALL demonstrate:

Context preservation.

Relationship continuity.

Historical reconstruction.

Architectural explainability.

Equivalent constitutional Presence behavior.

Implementation SHALL remain replaceable.

11. Presence Pattern

Architecture SHALL organize participation around Presence rather than connection.

Connection enables communication.

Presence enables understanding.

Architecture SHALL preserve understanding.

12. Presence Architecture Test

Presence Architecture satisfies this specification when an independent architect can reconstruct:

Who was constitutionally present.

In what context.

For what purpose.

How Presence evolved.

How Presence contributed to understanding.

How Presence remained meaningful despite implementation changes.

Without relying on implementation-specific session management.

Conformance

An implementation conforms to this specification when Presence remains historically attributable, contextually meaningful, architecturally reconstructable, and constitutionally distinguishable from technical connectivity.

Architectural Principle

A participant may be connected without being present.

A participant may be silent while profoundly present.

Architecture therefore preserves Presence,

because understanding grows not from continuous activity,

but from meaningful engagement with Questions,

Voices,

Places,

and the shared pursuit of deeper understanding.
