

OCS-001 — Constitutional Grammar

Status: Foundational

Authority: Constitutional

Depends on: OCS-000 — Constitutional Alphabet

Purpose

This specification defines how constitutional primitives combine to create constitutional meaning.

The Constitutional Alphabet defines what exists.

The Constitutional Grammar defines how existence becomes structure.

No constitutional construct SHALL exist unless it conforms to these grammatical rules.

1. Constitutional Composition

Every constitutional construct SHALL be composed exclusively from constitutional primitives.

Composition SHALL preserve the meaning of every participating primitive.

Composition SHALL NOT create hidden semantics.

Rule G-001

Every construct SHALL expose its primitive composition.

Example

```
Knowledge
=
Observation
+
Interpretation
+
Evidence
```

+
Memory
+
Continuity

Primitive composition SHALL remain explicit.

2. Constitutional Dependency

Constructs MAY depend upon other constructs.

Dependencies SHALL remain acyclic unless explicitly declared.

Circular constitutional meaning SHALL be considered ambiguity.

Ambiguity SHALL become a constitutional object.

3. Constitutional Direction

Every constitutional relationship SHALL expose direction.

Example

Evidence

supports

Interpretation

NOT

Evidence

equals

Interpretation

Meaning depends upon relationship.

Relationship SHALL remain explicit.

4. Constitutional Causality

Every constitutional consequence SHALL possess an observable cause.

Observation

↓

Interpretation

↓

Evidence

↓

Understanding

↓

Decision

↓

Action

Skipping constitutional layers SHALL require explicit justification.

5. Constitutional Separation

The following concepts SHALL remain distinguishable.

Observation

Interpretation

Evidence

Understanding

Decision

Action

Implementations SHALL NOT collapse these into a single object.

6. Constitutional Flow

Meaning SHALL flow through constitutional transitions.

Transitions SHALL preserve:

Identity

Context

History

Traceability

Meaning

Every transition SHALL remain observable.

7. Constitutional Context

Every construct SHALL inherit Context.

Context MAY be expanded.

Context SHALL NOT silently disappear.

Loss of Context SHALL reduce constitutional meaning.

8. Constitutional Scope

Every construct SHALL define:

Local Scope

Shared Scope

Inherited Scope

Public Scope (optional)

Scope SHALL remain explicit.

9. Constitutional Visibility

Every constitutional construct SHALL declare its visibility.

Possible visibility includes:

Private

Shared

Public

Canonical

Visibility SHALL NOT modify constitutional meaning.

Visibility modifies accessibility only.

10. Constitutional Ownership

Ownership SHALL remain explicit.

Ownership SHALL NOT imply authority.

Ownership SHALL NOT imply correctness.

Ownership identifies stewardship.

Nothing more.

11. Constitutional Authority

Authority SHALL always derive from constitutional evidence.

Authority SHALL NOT derive from:

Identity

Reputation

Role

Implementation

Popularity

Artificial intelligence

Human status

Every constitutional statement SHALL remain challengeable.

12. Constitutional Resolution

Every constitutional process SHALL terminate in exactly one of the following outcomes:

Improved Understanding

Improved Question

Improved Experiment

Improved Evidence

Deferred Interpretation

Continuation is a valid constitutional outcome.

Forced closure is not.

13. Constitutional Completeness

Completeness SHALL NOT mean certainty.

Completeness means that every known constitutional dependency is represented.

Unknown dependencies SHALL remain explicit.

14. Constitutional Symmetry

Equivalent constitutional inputs SHALL produce equivalent constitutional meaning.

Equivalent implementation SHALL NOT be required.

Equivalent semantics SHALL be required.

15. Constitutional Minimality

No constitutional construct SHALL contain unnecessary primitives.

If removal of one primitive does not change constitutional meaning,

that primitive SHALL NOT belong to the construct.

16. Constitutional Explainability

Every construct SHALL answer:

What am I?

Why do I exist?

What do I depend on?

How did I become what I am?

How may I change?

How may I disappear?

What survives my disappearance?

Failure to answer these questions constitutes constitutional incompleteness.

17. Constitutional Recursion

Every constitutional construct SHALL be decomposable.

Repeated decomposition SHALL eventually terminate in Constitutional Primitives.

No construct SHALL remain irreducible except those defined in OCS-000.

18. Constitutional Derivation

Every future specification SHALL declare:

Primitive Dependencies

Grammatical Rules

Derived Constructs

Constitutional Invariants

Conformance Tests

Specifications that omit derivation SHALL remain informative until completed.

Final Principle

The Constitutional Alphabet defines the language.

The Constitutional Grammar defines how the language becomes thought.

Every future protocol,

every Place,

every Library,

every Participant,

every implementation,

and every future discipline built upon Organodynamics

SHALL be derivable from these grammatical rules.

If two independent builders derive the same constitutional meaning,

the Grammar has succeeded.

If they derive different constitutional meanings,

the Grammar is incomplete.
