

OCS-010 — Constitutional Language

Status: Foundational

Authority: Constitutional

Depends on:

- OCS-000 — Constitutional Alphabet
 - OCS-001 — Constitutional Grammar
 - OCS-002 — Constitutional Logic
 - OCS-003 — Constitutional Mathematics
 - OCS-004 — Constitutional Semantics
 - OCS-005 — Constitutional Ontology
 - OCS-006 — Constitutional Epistemology
 - OCS-007 — Constitutional Methodology
 - OCS-008 — Constitutional Validation
 - OCS-009 — Constitutional Evolution
-

Purpose

This specification defines the constitutional language of Organodynamics.

The Constitutional Language establishes the principles by which constitutional meaning is expressed, communicated, translated, and preserved.

The objective of this specification is not linguistic uniformity.

The objective is semantic integrity.

Every constitutional publication SHALL conform to this specification.

1. Constitutional Language

Language is a constitutional representation of meaning.

Language is not meaning itself.

Meaning SHALL remain primary.

Language SHALL remain a vehicle for constitutional meaning.

2. Representation Independence

Constitutional meaning MAY be represented through:

Natural language

Formal notation

Mathematical expressions

Executable specifications

Graphs

Diagrams

Machine-readable formats

Future representational systems

No representation SHALL become constitutionally privileged.

3. Canonical Meaning

Every constitutional term SHALL possess exactly one canonical definition.

Representations MAY differ.

Canonical meaning SHALL remain stable until constitutionally revised.

Canonical definitions SHALL remain referenceable.

4. Terminology

Every constitutional term SHALL satisfy the following requirements:

Unambiguous within its declared context.

Explicitly defined.

Historically traceable.

Semantically distinguishable from related terms.

Terms SHALL NOT rely upon colloquial interpretation.

5. Synonyms

Multiple linguistic expressions MAY reference the same canonical meaning.

Synonyms SHALL reference the canonical definition.

Synonyms SHALL NOT create additional constitutional meaning.

6. Translation

Constitutional specifications MAY be translated into any language.

Translation SHALL preserve:

Meaning

Context

Normative intent

Requirement strength

Historical references

Translation SHALL NEVER silently modify constitutional semantics.

7. Normative Vocabulary

The following normative expressions SHALL retain identical constitutional force in every language:

MUST

SHALL

SHALL NOT

SHOULD

SHOULD NOT

MAY

Equivalent translations SHALL preserve normative intent.

8. Constitutional Definitions

Every constitutional definition SHALL answer:

What is it?

Why does it exist?

What distinguishes it?

How is it recognized?

What constitutional role does it perform?

Definitions SHALL remain implementation-independent.

9. Ambiguity

Linguistic ambiguity SHALL remain distinguishable from constitutional ambiguity.

If language introduces ambiguity,

the canonical definition SHALL prevail.

Ambiguity SHALL become a constitutional object.

It SHALL NOT be silently resolved.

10. Referential Language

Every constitutional reference SHALL identify:

Referenced construct

Version

Context (when required)

Relationship

References SHALL remain durable across constitutional evolution.

11. Layered Communication

The constitutional corpus MAY present identical meaning at different explanatory levels.

Examples include:

Introductory

Educational

Technical

Normative

Machine-readable

All explanatory layers SHALL reference the same canonical meaning.

Different explanations SHALL NOT imply different constitutional semantics.

12. Human and Artificial Readers

The constitutional language SHALL remain understandable by:

Human readers

Artificial reasoning systems

Future computational systems

No constitutional requirement SHALL depend exclusively upon human intuition.

No constitutional requirement SHALL depend exclusively upon machine interpretation.

13. Precision

Normative language SHALL prioritize:

Precision

Traceability

Consistency

Reconstructability

Elegance SHALL never reduce precision.

Brevity SHALL never reduce meaning.

14. Evolution of Language

Terminology MAY evolve.

Meaning SHALL evolve only through constitutional evolution.

Historical terminology SHALL remain interpretable.

Language SHALL preserve continuity across generations.

15. Constitutional Canon

The Constitutional Canon SHALL contain every canonical definition.

Specifications SHALL reference the Canon.

Specifications SHALL NOT redefine canonical terminology independently.

Expansion of the Canon SHALL follow Constitutional Evolution.

16. Language Integrity

Language Integrity SHALL require:

Stable definitions

Explicit terminology

Consistent references

Traceable revisions

Preserved normative intent

Violation of Language Integrity SHALL compromise constitutional interpretation.

Conformance

An implementation conforms to this specification when constitutional meaning remains equivalent across multiple representations, multiple human languages, and multiple computational representations without loss of normative intent.

Constitutional Principle

Languages change.

Technologies change.

Civilizations change.

The constitutional language exists so that meaning survives every one of those changes.

The language of Organodynamics is therefore not defined by words.

It is defined by the continuity of understanding they preserve.
