

ODM-015 — Discovery Portfolio

Status: Foundational

Authority: Methodology

Depends on:

- ODM-000 through ODM-014
 - OCS-000 through OCS-032
 - OAS-000 through OAS-031
 - OIS-000 through OIS-019
 - OGD-000 through OGD-023
-

Purpose

This specification defines the constitutional management of the complete portfolio of Discoveries within the Organodynamics discipline.

The Discovery Methodology governs individual investigations.

The Discovery Portfolio governs the discipline's collective program of inquiry.

Scientific progress depends not only on the quality of individual investigations,

but also on the coherence, balance, diversity, and coordination of the investigations pursued as a whole.

The portfolio SHALL preserve the health of discovery itself.

1. Objective

The objective of the Discovery Portfolio is to maintain a transparent and continuously evolving view of the constitutional research landscape.

Portfolio management SHALL support:

Strategic discovery.

Research diversity.

Knowledge integration.

Gap identification.

Methodological balance.

Long-term constitutional evolution.

2. Definition

A Discovery Portfolio is the complete constitutional representation of all active, completed, suspended, deferred, and historical Discoveries undertaken within the Organodynamics discipline.

The portfolio SHALL describe the ecosystem of inquiry.

Not merely individual investigations.

3. Portfolio Structure

The portfolio SHALL preserve, for every Discovery:

Current methodological state.

Associated Problem Frames.

Related Discoveries.

Shared Observations.

Dependencies.

Competing Hypotheses.

Applicable constitutional domains.

Historical status.

Portfolio structure SHALL remain observable.

4. Portfolio Analysis

Portfolio analysis SHOULD identify:

Clusters of related investigations.

Redundant investigations.

Underexplored constitutional domains.

Emerging research themes.

Methodological bottlenecks.

Potential opportunities for integration.

Analysis SHALL remain evidence-based.

5. Portfolio Balance

The portfolio SHOULD encourage balance across:

Foundational research.

Architectural research.

Implementation research.

Terminological research.

Methodological research.

Cross-disciplinary exploration.

Balance SHALL strengthen constitutional resilience.

It SHALL not prescribe identical allocation.

6. Evolution

The Discovery Portfolio SHALL evolve continuously.

Portfolio evolution SHALL preserve:

Historical investigations.

Completed research.

Rejected proposals.

Active uncertainties.

Long-term research trajectories.

Evolution SHALL remain reconstructable.

7. Verification

Verification SHALL demonstrate:

Portfolio completeness.

Relationship integrity.

Gap visibility.

Historical continuity.

Strategic traceability.

Independent reproducibility.

8. Discovery Portfolio Test

The Discovery Portfolio satisfies this specification when independent reviewers consistently reconstruct substantially equivalent representations of the discipline's active research landscape, identify similar strategic opportunities, and recognize comparable knowledge gaps using the documented methodological corpus.

9. Conformance

The Discovery Portfolio conforms to this specification when it preserves the complete constitutional landscape of discovery, maintains explicit relationships among investigations, supports strategic evolution, preserves historical continuity, and remains independently reviewable and reproducible.

Methodological Principle

A discovery changes understanding.

A portfolio changes the direction of a discipline.

Organodynamics therefore studies not only individual acts of discovery,

but the evolving ecosystem they collectively create.

For the future of a discipline depends as much on the questions it chooses to pursue,

as on the answers it eventually finds.
