

OGD-001 — Terminology Principles

Status: Foundational

Authority: Terminology

Depends on:

- OGD-000
 - OCS-000 through OCS-032
 - OAS-000 through OAS-031
 - OIS-000 through OIS-019
-

Purpose

This specification establishes the constitutional principles governing terminology throughout the Organodynamics corpus.

Language is infrastructure.

Terminology is architecture.

Meaning is constitutional.

The purpose of these principles is to ensure that every normative specification uses language with precision, consistency, and long-term stability.

1. Terminological Objective

The objective of the Organodynamics terminology system is to preserve constitutional meaning across generations of specifications, implementations, institutions, and technological change.

Terminology SHALL preserve:

Precision.

Consistency.

Historical continuity.

Independent interpretation.

Future evolution.

2. Canonical Meaning

Every canonical term SHALL possess exactly one canonical meaning.

Different contexts MAY emphasize different aspects of a term.

They SHALL NOT redefine its constitutional meaning.

3. Single Source of Truth

The Organodynamics Glossary SHALL serve as the authoritative source for all canonical terminology.

Normative specifications SHALL reference Glossary entries.

They SHALL avoid redefining established terms.

4. Referential Integrity

Specifications SHALL reference canonical terms using stable identifiers.

Terminological references SHALL remain:

Resolvable.

Historically reconstructable.

Version-aware.

Machine-readable where applicable.

Terminology SHALL become part of the constitutional graph.

5. Evolution of Meaning

Canonical meanings MAY evolve.

Every evolution SHALL preserve:

Previous definitions.

Reasons for change.

Historical applicability.

Compatibility guidance.

Terminological evolution SHALL remain observable.

6. Synonyms

Canonical terminology MAY recognize synonyms.

Exactly one designation SHALL remain canonical.

Alternative expressions SHALL explicitly reference the canonical term.

7. Deprecated Terms

Deprecated terminology SHALL remain historically accessible.

Deprecation SHALL preserve:

Historical usage.

Replacement terminology.

Migration guidance.

Applicable specification history.

Historical literature SHALL remain interpretable.

8. Cross-Specification Consistency

Equivalent constitutional ideas SHALL be expressed using identical canonical terminology across:

Constitutional Specifications.

Architectural Specifications.

Implementation Specifications.

Reference Models.

Methodological documents.

RFCs.

Educational material.

Terminological drift SHALL be minimized.

9. Verification

Terminological verification SHALL demonstrate:

Canonical usage.

Reference correctness.

Consistency.

Historical traceability.

Independent interpretability.

Terminology SHALL remain verifiable.

10. Terminology Principles Test

The terminology system satisfies this specification when independent readers, unfamiliar with the original authors, consistently reconstruct equivalent constitutional meaning across all Organodynamics publications by consulting the Glossary alone.

Conformance

A document conforms to this specification when every normative term is either defined by or explicitly references the Organodynamics Glossary, preserving constitutional precision, historical continuity, and independent interpretability.

Terminological Principle

Civilizations preserve knowledge through writing.

Disciplines preserve knowledge through language.

Organodynamics therefore protects its vocabulary with the same care that it protects its Constitution.

For if words slowly change their meaning,

then eventually the Constitution changes without anyone ever revising it.
