

OIS-006

Constitutional Evolution Protocol

1. Scope

This specification defines how constitutional knowledge evolves.

Evolution SHALL preserve constitutional continuity.

Evolution SHALL NOT depend upon implementation technology.

2. Principle

The Constitution is stable.

The understanding of the Constitution evolves.

Implementations SHALL distinguish between:

Interpretation

Extension

Modification

Replacement

These SHALL NOT be treated as equivalent operations.

3. Evolution Objects

Every proposal SHALL exist as a constitutional object.

Proposal SHALL contain:

Unique Identifier

Author

Creation Time

Motivation

Evidence

Expected Impact

Affected Canonical Objects

Alternatives Considered

Current Status

4. Proposal Lifecycle

DRAFT

UNDER REVIEW

↓

UNDER EXPERIMENT

↓

SUPPORTED

↓

CANONICAL
or
DRAFT

↓

REJECTED
Rejected proposals SHALL remain historically accessible.

5. Constitutional Evidence

Evidence SHALL be classified.
Possible categories include:
Observation
Experiment
Implementation Experience
Theoretical Analysis
Contradictory Evidence
External Research
Every proposal SHALL reference evidence.
Opinion alone SHALL NOT produce constitutional evolution.

6. Constitutional Stability

Constitutional evolution SHALL preserve:
Identity
Historical continuity
Backward interpretability
Implementations MAY require adaptation.
The Constitution SHALL remain explainable across versions.

7. Builder Responsibility

Builders SHALL implement constitutional behavior.
Builders SHALL NOT redefine constitutional meaning.
When ambiguity exists:
Implementation SHALL preserve the most conservative interpretation.
Ambiguity SHALL generate a Proposal.

OIS-007

Federation Protocol

Purpose

Independent Places SHALL cooperate without surrendering sovereignty.

Federation Principles

Every Place owns itself.

No Place owns another Place.
The Public Library coordinates.
It does not govern.

Federation SHALL support

Knowledge discovery
Shared references
Cross-place evidence
Shared experiments
Independent evolution

Federation SHALL NOT require

Shared database
Shared cloud
Shared programming language
Shared vendor
Shared deployment

Public Library

The Public Library SHALL function as a constitutional index.
It SHALL NOT function as a constitutional authority.
Authority remains distributed among constitutional Places.

Synchronization

Synchronization SHALL preserve:
Identity
History
Evidence
References
Version history
Relationships
Synchronization SHALL NEVER overwrite constitutional history.

OIS-008

Constitutional Validation

Purpose

Determine whether an implementation faithfully represents Organodynamics.
Validation SHALL evaluate constitutional behavior.
Validation SHALL NOT evaluate implementation technology.

Validation Categories

Identity
Continuity
Memory
Evolution
Evidence

Federation
Portability
Understanding

Required Tests

Can a Place survive technology replacement?
Can a Place survive repository migration?
Can a Place survive AI replacement?
Can a Place survive Builder replacement?
Can a Place reconstruct its complete constitutional history?
Can independent implementations exchange constitutional knowledge?
If every answer is YES,
the implementation conforms.

Appendix A

Builder Checklist

Before declaring an implementation complete, verify:

- ☐ Constitution implemented
- ☐ Canon implemented
- ☐ Place created
- ☐ Participant registered
- ☐ Contributions preserved
- ☐ History immutable
- ☐ Evidence linked
- ☐ Experiments operational
- ☐ Defaults configurable
- ☐ Library synchronized
- ☐ Export functional
- ☐ Import functional
- ☐ Federation functional
- ☐ Conformance tests passed

Appendix B

Reference Build Sequence

1. Read Constitution.
2. Read Canon.
3. Implement constitutional objects.
4. Implement lifecycle.
5. Implement operations.
6. Implement persistence.
7. Implement synchronization.
8. Implement federation.
9. Validate implementation.
10. Publish Place.
