

OIS-017 — Implementation Compliance

Status: Foundational

Authority: Implementation

Depends on:

- OIS-000 through OIS-016
 - OAS-000 through OAS-031
 - OCS-000 through OCS-032
-

Purpose

This specification defines the constitutional framework for Implementation Compliance.

Compliance determines whether an implementation faithfully realizes the Organodynamics Specifications throughout its operational existence.

Compliance is not certification.

Compliance is not regulation.

Compliance is the continuous demonstration that implementation behavior remains constitutionally equivalent.

Implementation SHALL continuously preserve compliance.

Compliance SHALL remain continuously observable.

1. Implementation Objective

The objective of Implementation Compliance is to ensure that constitutional behavior remains preserved throughout construction, deployment, operation, evolution, migration, and retirement.

Compliance SHALL preserve:

Behavioral equivalence.

Architectural integrity.

Historical continuity.

Operational traceability.

Verification evidence.

Constitutional accountability.

2. Definition

Implementation Compliance is the continuous operational confirmation that an implementation satisfies all applicable Constitutional, Architectural, and Implementation Specifications.

Compliance SHALL remain demonstrable.

It SHALL not be assumed.

3. Compliance Scope

Compliance SHALL evaluate:

Constitutional requirements.

Architectural requirements.

Implementation requirements.

Operational invariants.

Recovery guarantees.

Federation compatibility.

Historical preservation.

Future extensibility.

Scope SHALL remain explicit.

4. Continuous Compliance

Compliance SHALL be continuously evaluated.

Significant operational changes SHALL trigger renewed compliance verification.

Compliance SHALL evolve together with the implementation.

5. Compliance Evidence

Every compliance determination SHALL preserve:

Verification reports.

Behavioral observations.

Operational traces.

Recovery demonstrations.

Federation validation.

Applicable specification versions.

Evidence SHALL remain historically attributable.

6. Non-Conformance

Implementation SHALL distinguish between:

Operational defects.

Architectural non-conformance.

Constitutional non-conformance.

Only constitutional non-conformance invalidates implementation compliance.

7. Compliance Evolution

Compliance SHALL evolve with:

Specification revisions.

Architectural evolution.

Implementation evolution.

Verification improvements.

Historical compliance SHALL remain preserved.

8. Federated Compliance

Federated implementations SHALL preserve independent compliance.

Federation SHALL not require centralized certification.

Every Place SHALL remain independently verifiable.

9. Compliance Reporting

Implementations SHOULD expose compliance reports.

Reports SHALL summarize:

Applicable specifications.

Verification status.

Known limitations.

Recovery readiness.

Historical continuity.

Reports SHALL remain reproducible.

10. Compliance Verification

Verification SHALL confirm:

Behavioral equivalence.

Architectural compatibility.

Recovery correctness.

Historical preservation.

Independent reconstructability.

Verification SHALL remain implementation-neutral.

11. Implementation Compliance Test

Implementation Compliance satisfies this specification when independent verification teams repeatedly conclude that constitutional behavior remains preserved despite implementation evolution, operational change, technological replacement, and federation.

Conformance

An implementation conforms to this specification when compliance remains continuously demonstrable through reproducible constitutional verification, independent architectural analysis, operational evidence, and historical traceability.

Implementation Principle

Compliance is not a certificate that hangs on a wall.

It is a living constitutional relationship between an implementation and the discipline it serves.

Every deployment,

every migration,

every optimization,

and every generation of engineers must be able to demonstrate the same simple truth:
the implementation still preserves the Constitution.
