

OAS-012 — Conversation Architecture

Status: Foundational

Authority: Architectural

Depends on:

- OAS-000 through OAS-011
 - OCS-000 through OCS-032
-

Purpose

This specification defines the architectural role of Conversation.

Conversation is the primary evolutionary process through which constitutional understanding develops.

Conversation is not messaging.

Conversation is not a chat interface.

Conversation is the architectural process by which independent Voices transform observations into shared understanding.

Every constitutional evolution begins or continues through Conversation.

1. Architectural Objective

The objective of Conversation Architecture is to preserve the complete reasoning process through which constitutional understanding emerges.

Architecture SHALL preserve:

Questions.

Responses.

Challenges.

Clarifications.

Agreements.

Disagreements.

Revisions.

Reflection.

Conversation SHALL remain reconstructable.

2. Definition

A Conversation is an evolving constitutional relationship among Voices concerning one or more constitutional Questions.

A Conversation SHALL possess:

Identity.

Purpose.

Participants.

Context.

History.

Relationships.

A Conversation SHALL remain independently referenceable.

3. Conversation Independence

A Conversation SHALL remain independent of:

Messaging systems.

User interfaces.

Communication protocols.

Artificial intelligence providers.

Storage technologies.

Implementations MAY host Conversations.

They SHALL NOT define them.

4. Conversation Evolution

Conversations SHALL evolve continuously.

Evolution SHALL preserve:

Historical continuity.

Reasoning lineage.

Perspective diversity.

Revision history.

Every conversational evolution SHALL remain observable.

5. Conversational Turns

Every conversational contribution SHALL become an architectural event.

Turns SHALL preserve:

Voice.

Context.

Relationships.

Reasoning.

Historical ordering.

Turns SHALL remain immutable.

Interpretation MAY evolve.

6. Conversational Relationships

Conversations SHALL preserve explicit relationships among:

Questions.

Evidence.

Experiments.

Explanations.

Voices.

Places.

Libraries.

Architectural Patterns.

Conversation SHALL become navigable knowledge.

7. Constructive Tension

Architecture SHALL preserve productive disagreement.

Disagreement SHALL remain:

Visible.

Attributable.

Explainable.

Historically preserved.

Premature convergence SHALL be avoided.

8. Conversational Memory

Every Conversation SHALL preserve:

Questions introduced.

Ideas explored.

Reasoning paths.

Rejected alternatives.

Unexpected discoveries.

Architectural memory SHALL remain cumulative.

9. Conversation Federation

Conversations MAY span multiple Places.

Federation SHALL preserve:

Local context.

Voice attribution.

Relationship continuity.

Independent reconstruction.

Conversation SHALL remain coherent across Places.

10. Reflection

Architecture SHALL support reflection.

Reflection SHALL allow Conversations to examine:

Their own evolution.

Their assumptions.

Their unresolved questions.

Their architectural organization.

Reflection SHALL itself become constitutional history.

11. Conversation Verification

Verification SHALL demonstrate:

Reasoning continuity.

Voice continuity.

Historical reconstruction.

Perspective preservation.

Equivalent conversational understanding.

Different implementations MAY differ completely.

Equivalent constitutional conversations SHALL remain possible.

12. Architectural Pattern

Architecture SHALL organize around evolving Conversations rather than isolated messages.

Messages transmit information.

Conversations cultivate understanding.

Architecture SHALL preserve cultivation.

13. Conversation Architecture Test

Conversation Architecture satisfies this specification when an independent investigator can reconstruct:

Why the Conversation began.

How understanding evolved.

Which Voices contributed.

Which Questions remained unresolved.

Which ideas changed.

Why the Conversation still matters.

If any answer cannot be reconstructed,

Conversation Architecture is incomplete.

Conformance

An implementation conforms to this specification when Conversations remain persistent architectural entities preserving reasoning, perspective diversity, historical continuity, and constitutional evolution independently of communication technology.

Architectural Principle

Information travels through messages.

Understanding grows through conversations.

Architecture therefore preserves not merely what was said,

but the living dialogue through which Questions became discoveries,

discoveries became understanding,

and understanding became the foundation for the next conversation.
