

OCS-021 — Constitutional Questions

Status: Foundational

Authority: Constitutional

Depends on:

- OCS-000 through OCS-020
-

Purpose

This specification defines the constitutional role of Questions.

Questions are not merely requests for information.

Questions are constitutional engines of discovery.

Every significant constitutional evolution begins with a Question.

Organodynamics therefore treats Questions as first-class constitutional constructs.

1. Definition

A Constitutional Question identifies a boundary between current understanding and unknown reality.

A Question SHALL preserve:

Identity

Purpose

Context

Origin

History

Questions SHALL remain constitutional entities.

2. Purpose

The purpose of a Question is not to obtain an answer.

The purpose is to improve constitutional understanding.

Answers MAY change.

Questions SHALL preserve the history that generated them.

3. Types of Questions

Questions MAY seek:

Observation

Explanation

Prediction

Clarification

Evaluation

Design

Discovery

Validation

Evolution

The constitutional type SHALL remain explicit.

4. Good Questions

A Constitutional Question SHALL:

Be understandable.

Expose its context.

Expose its assumptions.

Be investigable.

Remain revisable.

Good Questions reduce ambiguity.

They do not necessarily reduce uncertainty.

5. Question Identity

Questions SHALL possess constitutional identity.

A revised Question SHALL preserve its lineage.

Questions SHALL never become anonymous.

6. Question Lifecycle

Every Constitutional Question SHALL progress through observable states.

Observed

↓

Formulated

↓

Investigated

↓

Expanded

↓

Partially Understood

↓

Revisited

↓

Historically Preserved

Questions MAY remain permanently open.

7. Questions and Answers

Answers SHALL reference their originating Questions.

Questions SHALL survive their answers.

Future answers MAY differ.

A Question SHALL never be erased because an answer currently exists.

8. Questions and Discovery

Every Constitutional Discovery SHALL reference at least one Constitutional Question.

Discovery without a Question SHALL remain constitutionally incomplete.

9. Questions and Uncertainty

Questions SHALL explicitly preserve:

Known unknowns.

Known assumptions.

Known ambiguity.

Known limitations.

A Question SHALL remain valuable even when no answer currently exists.

10. Questions and Understanding

Improved Understanding MAY generate better Questions.

The constitutional objective is therefore recursive.

Understanding produces Questions.

Questions produce Discovery.

Discovery produces Understanding.

11. Questions and Participants

Every participant MAY create Questions.

Question quality SHALL be evaluated through:

Clarity.

Investigability.

Potential explanatory value.

Not through participant identity.

12. Questions and Artificial Intelligence

Artificial Intelligence MAY generate Questions.

Artificial Intelligence MAY expand investigative possibilities.

Generated Questions SHALL remain constitutionally equivalent to human-generated Questions.

Origin SHALL remain attributable.

13. Preservation

The Constitutional Corpus SHALL preserve:

Answered Questions.

Unanswered Questions.

Rejected Questions.

Superseded Questions.

Forgotten Questions that were later rediscovered.

Question history is constitutional knowledge.

14. Constitutional Question Test

A Constitutional Question satisfies this specification when an independent investigator can determine:

Why the Question exists.

What is currently unknown.

What assumptions generated it.

What observations might improve understanding.

Why the Question remains valuable.

Conformance

An implementation conforms to this specification when Constitutional Questions remain identifiable, investigable, historically preserved, and continuously capable of generating improved constitutional understanding.

Constitutional Principle

Civilizations are often remembered for the answers they produced.

Disciplines endure because they preserve the Questions worth continuing to ask.

Organodynamics therefore measures its maturity not by the certainty of its conclusions,

but by the quality of the Questions it enables future generations to inherit.
