

ODM-001 — Discovery

Status: Foundational

Authority: Methodology

Depends on:

- ODM-000
 - OCS-000 through OCS-032
 - OAS-000 through OAS-031
 - OIS-000 through OIS-019
 - OGD-000 through OGD-023
-

Purpose

This specification defines the constitutional meaning of Discovery within the Organodynamics discipline.

Discovery is not the creation of truth.

Discovery is the recognition of previously unrecognized constitutional understanding.

Truth exists independently of its discoverer.

Discovery establishes the disciplined process through which that truth becomes observable, examinable, and eventually incorporable into the constitutional corpus.

Discovery SHALL reveal.

It SHALL not invent.

1. Objective

The objective of Discovery is to establish a repeatable and constitutionally accountable process for identifying candidate knowledge worthy of scientific examination.

Discovery SHALL preserve:

Intellectual honesty.

Evidence.

Reproducibility.

Historical traceability.

Methodological transparency.

2. Definition

A Discovery is a proposed constitutional understanding that explains an observable phenomenon more completely, more coherently, or more economically than the current constitutional corpus.

A Discovery MAY:

Extend existing understanding.

Clarify existing understanding.

Unify previously unrelated observations.

Reveal constitutional limitations.

A Discovery SHALL NOT become constitutional knowledge merely because it is new.

3. Characteristics of Discovery

Every Discovery SHOULD demonstrate:

Observability.

Conceptual necessity.

Explanatory value.

Internal coherence.

Compatibility with the existing corpus, or an explicit explanation of why revision is required.

Discovery SHALL be distinguishable from speculation.

4. Discovery Evidence

Every Discovery SHALL preserve explicit evidence supporting its proposal.

Evidence MAY include:

Empirical observation.

Logical analysis.

Architectural reasoning.

Comparative evaluation.

Formal proof.

Historical analysis.

Evidence SHALL remain independently reviewable.

5. Discovery Record

Every Discovery SHALL create a permanent methodological record including:

The original proposal.

The motivating observations.

Supporting evidence.

Alternative explanations considered.

Applicable concepts and specifications.

Subsequent methodological outcomes.

The record SHALL remain permanently accessible, regardless of the final decision.

6. Relationship to the Constitutional Corpus

A Discovery SHALL remain external to the constitutional corpus until it successfully completes the methodological processes defined by subsequent ODM specifications.

Proposal SHALL remain distinct from acceptance.

Curiosity SHALL remain distinct from constitutional authority.

7. Verification

Verification SHALL demonstrate:

Evidence availability.

Reasoning transparency.

Conceptual coherence.

Historical traceability.

Independent reproducibility.

Methodological integrity.

8. Discovery Test

A Discovery satisfies this specification when independent reviewers, using only the documented observations, evidence, reasoning, and methodological record, consistently recognize that the proposal identifies a constitutionally meaningful phenomenon worthy of formal scientific evaluation, regardless of whether it is ultimately accepted or rejected.

Conformance

A Discovery conforms to this specification when it is documented transparently, supported by explicit evidence, methodologically traceable, historically preserved, independently reviewable, and clearly distinguished from established constitutional knowledge.

Methodological Principle

Every scientific discipline depends upon the courage to ask new questions.

It depends equally upon the discipline to distinguish discovery from conviction.

Organodynamics therefore honors every genuine discovery,

not because it is destined to become constitutional truth,

but because it deserves to be examined with the same rigor,

the same transparency,

and the same intellectual humility that protect every part of the discipline.
