

ODM-010 — Assessment

Status: Foundational

Authority: Methodology

Depends on:

- ODM-000 through ODM-009
 - OCS-000 through OCS-032
 - OAS-000 through OAS-031
 - OIS-000 through OIS-019
 - OGD-000 through OGD-023
-

Purpose

This specification defines the constitutional role of Assessment within the Organodynamics Discovery Methodology.

Assessment is the disciplined evaluation of the current state of understanding following Interpretation.

Assessment does not establish constitutional truth.

It establishes the present methodological judgment regarding the investigated phenomenon.

Assessment SHALL summarize understanding.

It SHALL not exercise constitutional authority.

1. Objective

The objective of Assessment is to produce a transparent, evidence-based characterization of the current explanatory status of a Problem Frame.

Assessment SHALL preserve:

Evidence accountability.

Interpretive transparency.

Methodological consistency.

Historical continuity.

Explicit uncertainty.

2. Definition

An Assessment is the documented methodological judgment resulting from one or more Interpretations.

An Assessment SHALL identify:

The current explanatory status.

The supporting evidence.

Remaining uncertainties.

Competing explanations.

Outstanding questions.

Recommended future investigation.

Assessment SHALL describe the present state of knowledge.

It SHALL not redefine the constitutional corpus.

3. Assessment Outcomes

An Assessment MAY conclude that:

Current evidence strongly supports the Hypothesis.

Current evidence partially supports the Hypothesis.

Current evidence is inconclusive.

Current evidence favors an alternative explanation.

Current evidence requires reformulation of the Problem Frame.

Current evidence suggests constitutional investigation should continue.

Assessment outcomes SHALL remain explicitly justified.

4. Confidence

Every Assessment SHALL characterize confidence in its conclusions.

Confidence SHALL consider:

Evidence quality.

Evidence quantity.

Methodological rigor.

Reproducibility.

Remaining uncertainty.

Confidence SHALL remain explicitly documented.

5. Relationship to Discovery

An Assessment MAY recommend:

Additional Observations.

New Pattern Recognition.

Alternative Explanations.

Revised Hypotheses.

Additional Investigations.

Preparation of a constitutional proposal.

Assessment SHALL recommend.

It SHALL not adopt.

6. Historical Preservation

Every Assessment SHALL preserve:

Applicable Interpretations.

Supporting evidence.

Confidence evaluation.

Known limitations.

Subsequent revisions.

Historical continuity.

7. Verification

Verification SHALL demonstrate:

Assessment transparency.

Evidence traceability.

Confidence justification.

Methodological consistency.

Historical continuity.

Independent reproducibility.

8. Assessment Test

An Assessment satisfies this specification when independent reviewers, using the same documented Interpretations and evidence, consistently characterize the explanatory status of the investigated phenomenon with substantially equivalent confidence, uncertainties, and methodological recommendations.

9. Conformance

An Assessment conforms to this specification when it transparently summarizes the current state of understanding, preserves explicit confidence and uncertainty, maintains historical traceability, remains methodologically accountable, and is independently reviewable and reproducible.

Methodological Principle

Scientific understanding rarely changes in a single moment.

It advances through increasingly reliable assessments of what the available evidence presently allows us to believe.

Assessment therefore preserves the discipline's intellectual honesty.

It acknowledges that today's best understanding may become tomorrow's historical stepping stone,

while ensuring that every step remains visible,

traceable,

and worthy of future re-examination.
