

ODM-013 — Constitutional Integration

Status: Foundational

Authority: Methodology

Depends on:

- ODM-000 through ODM-012
 - OCS-000 through OCS-032
 - OAS-000 through OAS-031
 - OIS-000 through OIS-019
 - OGD-000 through OGD-023
-

Purpose

This specification defines the constitutional integration process through which an accepted proposal becomes part of the Organodynamics corpus.

Acceptance concludes review.

Integration begins constitutional life.

The purpose of Constitutional Integration is to preserve the coherence, consistency, and traceability of the corpus while incorporating newly accepted constitutional understanding.

Integration SHALL preserve continuity.

It SHALL not merely append new material.

1. Objective

The objective of Constitutional Integration is to incorporate accepted constitutional knowledge into the Organodynamics corpus without compromising its semantic, architectural, methodological, or historical integrity.

Integration SHALL preserve:

Corpus coherence.

Historical continuity.

Cross-volume consistency.

Semantic integrity.

Architectural compatibility.

Implementation compatibility.

2. Definition

Constitutional Integration is the coordinated process through which an accepted proposal is incorporated into every affected part of the Organodynamics corpus.

Integration SHALL identify every affected constitutional artifact.

3. Integration Scope

The Integration process SHALL evaluate impacts upon:

Constitutional Specifications.

Architectural Specifications.

Implementation Specifications.

Glossary entries.

Methodological Specifications.

Reference Models.

Reference Implementations.

Verification artifacts.

Educational material.

Future constitutional artifacts MAY be incorporated as the corpus evolves.

4. Integration Plan

Every Integration SHALL preserve an explicit Integration Plan.

The plan SHALL identify:

Affected documents.

Affected concepts.

Affected relationships.

Affected references.

Affected verification procedures.

Migration guidance.

Expected constitutional outcomes.

The plan SHALL remain permanently attributable.

5. Semantic Consistency

Integration SHALL preserve:

Canonical terminology.

Concept boundaries.

Semantic relationships.

Interpretive equivalence.

Cross-volume coherence.

No accepted proposal SHALL introduce unresolved semantic inconsistency.

6. Historical Preservation

Integration SHALL preserve:

The original proposal.

The Constitutional Review.

The integration decisions.

Affected revisions.

Historical lineage.

Every constitutional change SHALL remain reconstructable.

7. Verification

Verification SHALL demonstrate:

Successful corpus integration.

Reference consistency.

Semantic compatibility.

Historical continuity.

Cross-volume integrity.

Independent reproducibility.

8. Constitutional Integration Test

Constitutional Integration satisfies this specification when independent reviewers consistently determine that every accepted constitutional proposal has been incorporated into the Organodynamics corpus without introducing unresolved contradictions, semantic inconsistency, historical discontinuity, or cross-volume incompatibility.

9. Conformance

A Constitutional Integration conforms to this specification when it transparently updates every affected constitutional artifact, preserves semantic and historical integrity, maintains explicit traceability, and remains independently reproducible and reviewable.

Methodological Principle

Knowledge becomes constitutional not when it is accepted,

but when it is woven into the living fabric of the discipline.

Integration is therefore the moment at which an isolated discovery becomes part of a larger understanding,

strengthening not only the new idea,

but every constitutional relationship that now includes it.

The discipline grows not by accumulation,

but by coherent integration.
