

ODM-016 — Research Prioritization

Status: Foundational

Authority: Methodology

Depends on:

- ODM-000 through ODM-015
 - OCS-000 through OCS-032
 - OAS-000 through OAS-031
 - OIS-000 through OIS-019
 - OGD-000 through OGD-023
-

Purpose

This specification defines the constitutional principles governing the prioritization of research within the Organodynamics Discovery Portfolio.

The purpose of Research Prioritization is not to determine which questions are intellectually worthy.

Every constitutionally valid question is worthy of investigation.

Its purpose is to determine the order and allocation of limited research resources in a transparent, evidence-based, and constitutionally accountable manner.

Prioritization SHALL optimize the evolution of understanding.

It SHALL not determine the legitimacy of inquiry.

1. Objective

The objective of Research Prioritization is to support strategic allocation of attention, effort, and methodological resources across the Discovery Portfolio.

Prioritization SHALL preserve:

Transparency.

Fairness.

Constitutional neutrality.

Adaptability.

Long-term disciplinary growth.

2. Definition

Research Prioritization is the methodological evaluation of candidate investigations according to their expected contribution to the constitutional evolution of the Organodynamics corpus.

Priority SHALL influence sequencing.

It SHALL not determine scientific validity.

3. Prioritization Factors

Prioritization MAY consider:

Potential explanatory impact.

Reduction of constitutional uncertainty.

Dependencies with ongoing investigations.

Breadth of constitutional influence.

Availability of evidence.

Methodological readiness.

Feasibility.

Urgency arising from unresolved contradictions.

No single factor SHALL determine priority.

4. Dynamic Priority

Research priorities SHALL remain subject to revision.

Priority MAY change in response to:

New observations.

New discoveries.

Technological advances.

Methodological improvements.

Changes within the Discovery Portfolio.

Historical developments.

Priority SHALL remain explicitly reviewable.

5. Portfolio Integration

Prioritization SHALL remain compatible with the Discovery Portfolio.

Priority decisions SHOULD preserve:

Research diversity.

Exploration of foundational questions.

Balance among constitutional domains.

Opportunities for cross-disciplinary discovery.

The portfolio SHALL remain resilient rather than narrowly optimized.

6. Historical Preservation

Every prioritization decision SHALL preserve:

Applicable criteria.

Available evidence.

Alternative prioritization options.

Reasons for the final ranking.

Subsequent revisions.

Historical continuity.

7. Verification

Verification SHALL demonstrate:

Decision transparency.

Evidence traceability.

Consistency of applied criteria.

Historical continuity.

Independent reproducibility.

Prioritization SHALL remain explainable.

8. Research Prioritization Test

Research Prioritization satisfies this specification when independent reviewers, applying the documented prioritization criteria to the same Discovery Portfolio, consistently identify substantially similar research priorities while preserving constitutional neutrality and methodological transparency.

9. Conformance

Research Prioritization conforms to this specification when it allocates methodological attention transparently, preserves explicit reasoning, maintains historical traceability, remains adaptable to new evidence, and is independently reviewable and reproducible.

Methodological Principle

A discipline grows through curiosity.

It advances through choice.

Every unanswered question deserves respect,

but not every question must be investigated first.

Research Prioritization therefore protects the discipline from confusing abundance with direction,

ensuring that limited attention is invested where it has the greatest potential to expand constitutional understanding,

while preserving the legitimacy of every future question.
