

ODM-019 — Sufficiency

Status: Foundational

Authority: Methodology

Depends on:

- ODM-000 through ODM-018
 - OCS-000 through OCS-032
 - OAS-000 through OAS-031
 - OIS-000 through OIS-019
 - OGD-000 through OGD-023
-

Purpose

This specification defines the constitutional principles governing methodological sufficiency within the Organodynamics Discovery Methodology.

The objective of scientific inquiry is not to eliminate all uncertainty.

It is to reduce uncertainty sufficiently to justify the next constitutional action.

Methodological Sufficiency identifies the conditions under which additional investigation is no longer expected to produce proportionate constitutional benefit.

Sufficiency SHALL justify progress.

It SHALL not imply certainty.

1. Objective

The objective of Methodological Sufficiency is to provide transparent criteria for determining when the current body of evidence adequately supports the next stage of constitutional evolution.

Sufficiency SHALL preserve:

Scientific humility.

Decision transparency.

Evidence accountability.

Methodological proportionality.

Historical traceability.

2. Definition

Methodological Sufficiency is the documented judgment that the available methodological record provides an adequate basis for a specified constitutional action despite the continued existence of uncertainty.

Sufficiency SHALL concern readiness for action.

It SHALL not claim completeness of knowledge.

3. Dimensions of Sufficiency

Sufficiency MAY consider:

Quality of evidence.

Breadth of investigation.

Consistency of interpretation.

Independent reproducibility.

Remaining uncertainty.

Potential constitutional impact.

Expected value of additional investigation.

No single dimension SHALL determine sufficiency.

4. Action Context

Sufficiency SHALL always identify the constitutional action for which it is claimed.

Examples MAY include:

Proceeding to Constitutional Review.

Conducting further Investigation.

Initiating Reassessment.

Publishing a Reference Model.

Preparing educational material.

Sufficiency SHALL remain context-dependent.

5. Residual Uncertainty

Every declaration of Sufficiency SHALL preserve:

Known uncertainties.

Open questions.

Competing explanations.

Potential risks.

Expected future review.

Residual uncertainty SHALL remain visible.

6. Historical Preservation

Every Sufficiency determination SHALL preserve:

Supporting evidence.

Applicable Assessments.

Reasoning process.

Alternative positions.

Historical context.

Subsequent outcomes.

Historical continuity SHALL remain reconstructable.

7. Verification

Verification SHALL demonstrate:

Evidence proportionality.

Reasoning transparency.

Explicit uncertainty.

Historical continuity.

Independent reproducibility.

Sufficiency SHALL remain explainable.

8. Sufficiency Test

Methodological Sufficiency satisfies this specification when independent reviewers consistently conclude that the available methodological record adequately supports the specified constitutional action while explicitly recognizing the remaining uncertainty and the potential value of future investigation.

9. Conformance

A methodological determination conforms to this specification when it transparently identifies the action being justified, documents explicit reasoning and remaining uncertainty, preserves historical traceability, and remains independently reviewable and reproducible.

Methodological Principle

Science advances not because uncertainty disappears,

but because understanding eventually becomes sufficient to justify responsible action.

Organodynamics therefore measures progress not by the absence of doubt,

but by the disciplined recognition that further delay would contribute less to understanding than the next carefully documented step forward.

Certainty is not the constitutional requirement.

Responsible sufficiency is.
