

ODM-021 — Error Patterns

Status: Foundational

Authority: Methodology

Depends on:

- ODM-000 through ODM-020
- OCS-000 through OCS-032
- OAS-000 through OAS-031
- OIS-000 through OIS-019
- OGD-000 through OGD-023

Purpose

This specification defines the constitutional principles governing the identification, preservation, and analysis of recurring methodological error patterns within the Organodynamics Discovery Methodology.

Individual errors may be unavoidable.

Repeated errors without learning are methodological failures.

The purpose of Error Patterns is to transform isolated mistakes into reusable methodological knowledge.

The discipline SHALL remember not only its discoveries, but also the characteristic ways in which it has been mistaken.

1. Objective

The objective of Error Patterns is to improve the long-term quality of discovery by identifying recurring patterns of methodological error and incorporating that knowledge into future investigations.

Error Patterns SHALL preserve:

Institutional learning.

Methodological transparency.

Historical accountability.

Continuous improvement.

Epistemic resilience.

2. Definition

An Error Pattern is a recurring methodological tendency that systematically reduces the quality, reliability, or completeness of constitutional inquiry.

An Error Pattern concerns the process of discovery.

It does not assign blame to individuals.

3. Sources of Error Patterns

Error Patterns MAY emerge from:

Repeated investigative failures.

Recurring review observations.

Implementation experience.

Portfolio analysis.

Methodological retrospectives.

Cross-disciplinary comparison.

Historical reassessment.

The origin of every Error Pattern SHALL be documented.

4. Error Pattern Record

Every Error Pattern SHALL preserve:

The recurring behavior.

Observed consequences.

Illustrative investigations.

Conditions under which it appears.

Known mitigating practices.

Historical evolution.

Associated methodological revisions.

The record SHALL remain historically attributable.

5. Relationship to Methodological Learning

Error Patterns SHALL inform Methodological Learning.

The identification of an Error Pattern MAY motivate:

Methodological refinement.

Educational revision.

Updated guidance.

Additional verification.

New investigative practices.

The relationship SHALL remain explicit.

6. Historical Preservation

Every Error Pattern SHALL preserve:

Original identification.

Supporting evidence.

Alternative interpretations.

Subsequent occurrences.

Mitigation history.

Observed effectiveness.

Historical continuity SHALL remain reconstructable.

7. Verification

Verification SHALL demonstrate:

Pattern recurrence.

Evidence traceability.

Methodological significance.

Historical continuity.

Independent reproducibility.

Error Pattern analysis SHALL remain explainable.

8. Error Patterns Test

Error Patterns satisfy this specification when independent reviewers consistently identify substantially equivalent recurring methodological

weaknesses across multiple investigations and demonstrate that recognizing those patterns can improve future discovery without altering constitutional standards.

9. Conformance

The Discovery Methodology conforms to this specification when it systematically preserves recurring methodological error patterns, documents their historical development, integrates them into methodological learning, and maintains transparent, independently reviewable records of their identification and mitigation.

Methodological Principle

A discipline matures not only by accumulating successful discoveries, but by recognizing the characteristic ways in which its own methods can mislead it.

Mistakes become wisdom only when their patterns are remembered.

Organodynamics therefore preserves methodological error not as failure, but as constitutional evidence about how better discovery becomes possible.
