

OGD-010 — Concept Authority

Status: Foundational

Authority: Terminology

Depends on:

- OGD-000 through OGD-009
 - OCS-000 through OCS-032
 - OAS-000 through OAS-031
 - OIS-000 through OIS-019
-

Purpose

This specification defines the constitutional authority model for canonical concepts within the Organodynamics corpus.

Not every concept serves the same constitutional role.

Some concepts establish foundations.

Some organize architecture.

Some describe implementation.

Some exist solely to educate or illustrate.

Concept Authority identifies the normative role of every canonical concept without altering its definition.

Authority SHALL clarify constitutional significance.

It SHALL not imply hierarchy of importance.

1. Objective

The objective of Concept Authority is to enable independent readers, implementers, educators, and automated systems to distinguish the constitutional role performed by each canonical concept.

Authority SHALL improve interpretation.

Authority SHALL preserve semantic neutrality.

2. Authority Classes

Every canonical concept SHALL declare one or more authority classes.

Authority classes MAY include:

Foundational.

Normative.

Architectural.

Implementation.

Methodological.

Educational.

Historical.

Illustrative.

Experimental.

Future authority classes MAY be introduced through constitutional revision.

3. Normative Authority

Concepts possessing normative authority SHALL directly influence one or more Organodynamics specifications.

Normative authority SHALL require:

Explicit specification references.

Constitutional traceability.

Historical continuity.

Normative concepts SHALL remain version-aware.

4. Educational Authority

Educational concepts SHALL support understanding.

They SHALL NOT introduce new constitutional meaning.

Educational authority SHALL remain explicitly distinguishable from normative authority.

5. Historical Authority

Historical concepts SHALL preserve:

Previous terminology.

Previous interpretations.

Specification lineage.

Historical context.

Historical authority SHALL never invalidate canonical meaning.

6. Experimental Authority

Experimental concepts MAY appear within research or methodological work.

Experimental authority SHALL remain explicitly identified.

Experimental concepts SHALL NOT become normative without constitutional governance.

7. Authority Relationships

Authority SHALL remain compatible with:

Concept taxonomy.

Semantic relationships.

Lifecycle state.

Specification references.

Authority SHALL complement,

not replace,

constitutional definitions.

8. Verification

Verification SHALL demonstrate:

Correct authority assignment.

Normative consistency.

Historical traceability.

Educational separation.

Conceptual integrity.

Authority SHALL remain independently interpretable.

9. Concept Authority Test

The Concept Authority model satisfies this specification when independent readers consistently distinguish foundational, normative, architectural, implementation, educational, historical, and experimental concepts while preserving equivalent constitutional understanding.

Conformance

The Organodynamics Glossary conforms to this specification when every canonical concept possesses explicit authority classification, constitutional traceability, historical continuity, semantic consistency, and independently verifiable interpretability.

Terminological Principle

Every concept contributes to a discipline.

Not every concept contributes in the same way.

Understanding therefore requires knowing not only what a concept means,

but also why it exists,

what responsibility it carries,

and how it participates in the constitutional structure of knowledge.

Authority illuminates purpose.

Meaning remains unchanged.
