

OIS-400

Knowledge Model

Status

Normative

Purpose

This specification defines the constitutional model of Knowledge.

Knowledge SHALL be treated as an evolving constitutional construct.

Knowledge SHALL NOT be interpreted as immutable truth.

Knowledge SHALL remain explainable, traceable, and revisable.

1. Constitutional Definition

Knowledge is a justified constitutional understanding supported by evidence within a defined context.

Knowledge is not equivalent to:

Data

Information

Opinion

Belief

Decision

Knowledge emerges through constitutional processes.

2. Knowledge Components

Every constitutional Knowledge Object SHALL expose:

Identity

Scope

Context

Evidence

Confidence

History

Relationships

Current Interpretation

Known Limitations

Revision History

3. Knowledge Lifecycle

Every Knowledge Object SHALL follow the constitutional lifecycle.

UNKNOWN

↓

OBSERVED

↓

PROPOSED

↓

SUPPORTED

Historical states SHALL remain reconstructable.

No historical state SHALL be destroyed.

4. Knowledge Confidence

Every Knowledge Object SHALL expose an explicit confidence level.

Confidence SHALL NOT represent certainty.

Confidence represents current constitutional support.

Confidence SHALL be evidence-based.

Confidence SHALL remain revisable.

5. Knowledge Sources

Knowledge MAY originate from:

Observation

Experiment

Simulation

Historical Record

External Research

Human Experience

Artificial Analysis

Independent Place

Every source SHALL remain identifiable.

6. Knowledge Relationships

Knowledge Objects SHALL explicitly reference:

Supporting Knowledge

Contradicting Knowledge

Dependent Knowledge

Superseding Knowledge

Related Experiments

Related Evidence

Relationships SHALL remain observable.

7. Knowledge SHALL NOT

Knowledge SHALL NOT overwrite historical knowledge.

Knowledge SHALL NOT erase competing interpretations.

Knowledge SHALL NOT suppress contradictory evidence.

Knowledge SHALL remain capable of constitutional challenge.

OIS-401

Hypothesis Model

Definition

A Hypothesis is a constitutional explanation awaiting sufficient evidence.

A Hypothesis SHALL NOT be treated as Knowledge.

Every Hypothesis SHALL expose:

Statement

Motivation

Expected Evidence

Failure Conditions

Confidence

Current Status

Related Experiments

Lifecycle

CREATED

↓

UNDER EXPERIMENT

↓

SUPPORTED

↓

KNOWLEDGE

or

↓

REFUTED

Refuted hypotheses SHALL remain historically visible.

OIS-402

Experiment Model

Purpose

Generate constitutional evidence.

An Experiment SHALL exist to reduce uncertainty.

It SHALL NOT exist to confirm assumptions.

Every Experiment SHALL define:

Question

Hypothesis

Method

Expected Evidence

Observed Evidence

Unexpected Findings

Conclusion

Future Questions

Failure to confirm a hypothesis SHALL NOT constitute experimental failure.

Failure to learn SHALL constitute experimental failure.

OIS-403

Evidence Model

Evidence SHALL support interpretation.

Evidence SHALL NOT replace interpretation.

Evidence SHALL expose:

Origin

Collector

Timestamp

Method

Scope

Confidence

Limitations

Related Objects

Evidence MAY support multiple interpretations.

Evidence SHALL NOT be forced into a single conclusion.

OIS-404

Contradiction

Contradiction is constitutional information.

Contradictions SHALL be preserved.

Implementations SHALL NOT automatically resolve contradictions.

Contradictions MAY initiate:

New Experiments

New Hypotheses

Constitutional Review

Additional Evidence Collection

OIS-405

Understanding

Understanding is the current constitutional synthesis of available knowledge.

Understanding SHALL remain provisional.

Understanding SHALL evolve through evidence.

Understanding SHALL remain challengeable.

Understanding SHALL NOT be interpreted as final truth.

OIS-406

Decision

A Decision represents a temporary commitment to action.

A Decision SHALL reference:

Current Understanding

Evidence

Alternatives Considered

Known Uncertainties

Expected Review Conditions

A Decision SHALL NOT modify Knowledge.

Subsequent evidence MAY invalidate a Decision.

OIS-407

Discovery

A Discovery occurs when constitutional understanding changes through evidence.

Discovery SHALL preserve:

Previous Understanding

New Understanding

Evidence

Reason for Change

Discovery SHALL increase constitutional history.

OIS-408

Knowledge Integrity

Knowledge Integrity SHALL require:

Complete Traceability

Historical Continuity

Explicit Confidence

Observable Relationships

Recoverable Context

Explainable Interpretation

If any element becomes unrecoverable,

Knowledge Integrity has been compromised.

OIS-409

Constitutional Learning

Learning SHALL be defined as:

A measurable improvement in constitutional understanding resulting from new evidence.

Accumulating information SHALL NOT alone constitute learning.

Repeating existing knowledge SHALL NOT constitute learning.

Learning SHALL produce at least one observable constitutional change.

OIS-410

Constitutional Axiom

The objective of Organodynamics is not the accumulation of knowledge.

The objective is the continuous improvement of understanding through evidence, interpretation, and responsible revision.
