

OIS-500

Place Protocol

Status

Normative

Purpose

This specification defines the constitutional behavior of a Place.

A Place is the primary constitutional environment in which understanding emerges, evolves, and is preserved.

A Place SHALL exist independently of any implementation technology.

1. Definition

A Place is a sovereign constitutional environment.

A Place is not:

an application,

a workspace,

a project,

a repository,

or a database.

These MAY implement a Place.

They SHALL NOT define it.

2. Constitutional Identity

Every Place SHALL possess a permanent constitutional identity.

Identity SHALL survive:

technology migration,

builder replacement,

repository migration,

storage migration,

AI replacement,

user replacement.

Identity SHALL remain globally unique.

Identity SHALL remain immutable.

3. Constitutional Purpose

Every Place SHALL explicitly declare:

Purpose

Scope

Initial Intention

Current State

Constitution Version

Canonical Version

Creation Event

Purpose MAY evolve.

Historical purposes SHALL remain observable.

4. Constitutional Boundaries

Every Place SHALL define:

What belongs inside.

What remains outside.

What may cross its boundary.

Boundary changes SHALL become constitutional events.

5. Place Lifecycle

NONEXISTENT

↓

PROPOSED

↓

CREATED

↓

ACTIVE

↓

EVOLVING

↓

DORMANT

↓

ARCHIVED

↓

RECOVERED

Deletion SHALL NOT be a constitutional lifecycle state.

6. Place Memory

Every Place SHALL preserve:

History

Evidence

Experiments

Defaults

Interpretations

Decisions

Relationships

Memory SHALL remain reconstructable.

7. Place Sovereignty

Every Place owns:

its constitutional identity,

its constitutional memory,

its constitutional history,

its constitutional relationships.

Implementations SHALL temporarily host a Place.

Implementations SHALL NOT own a Place.

8. Place Participants

Every Place MAY contain:

Humans

Artificial Participants

Organizations

Future constitutional participant types

Participation SHALL NOT modify constitutional equality.

Capabilities MAY differ.

Constitutional status SHALL NOT.

9. Place Contributions

Every Contribution SHALL belong to at least one Place.

A Contribution MAY be referenced by multiple Places.

Ownership SHALL remain explicit.

References SHALL preserve provenance.

10. Place Defaults

Every Place MAY define local Defaults.

Local Defaults SHALL NOT modify constitutional principles.

Inheritance of Defaults SHALL remain explicit.

11. Place Evolution

Places evolve through:

Experiments

Evidence

Interpretation

Learning

Constitutional evolution SHALL remain externally observable.

OIS-501

Place Federation

Purpose

Independent Places SHALL cooperate while preserving sovereignty.

Federation Principles

Federation SHALL preserve:

Identity

History

Meaning

Ownership

Evidence

Context

Federation SHALL NOT require central authority.

Knowledge Exchange

Places MAY exchange:

References

Evidence

Experiments

Canonical Objects

Interpretations

Places SHALL NOT overwrite each other's constitutional history.

Cross-Place References

Every external reference SHALL include:

Origin Place

Referenced Object

Relationship Type

Reference Time

Version

References SHALL remain durable.

OIS-502

Public Library Protocol

Purpose

The Public Library enables constitutional discovery.

It SHALL NOT become the owner of constitutional knowledge.

Responsibilities

The Public Library SHALL:

Index Places

Index Canonical Objects

Index Discoveries

Index Public Experiments

Index Public Knowledge

The Public Library SHALL NOT:

Modify constitutional history

Rewrite Place identity

Override constitutional meaning

Publication

A Place MAY publish:

Entire constitutional history

Selected constitutional objects

Canonical discoveries

Experiments

Evidence

Publication SHALL be reversible.

Constitutional history SHALL remain unchanged.

Discovery

The Public Library SHALL support discovery through:

Canonical Objects

Meaning

Relationships

Evidence

Topics

Constitutional references

Implementation technology SHALL remain irrelevant.

OIS-503

Place Synchronization

Synchronization SHALL preserve:

Identity

Meaning

History

Evidence

Relationships

Lifecycle

Synchronization SHALL detect:

Conflicts

Missing History

Meaning Drift

Version Divergence

Synchronization SHALL NEVER silently discard constitutional information.

Conflict Resolution

Conflicts SHALL become constitutional objects.

Conflicts SHALL contain:

Origin

Competing Interpretations

Supporting Evidence

Historical Context

Possible Resolutions

Conflicts SHALL remain visible until resolved.

Automatic conflict resolution SHALL NOT occur unless constitutionally authorized.

OIS-504

Place Inheritance

A Place MAY originate from another Place.

Derived Places SHALL preserve reference to:

Parent Place

Creation Event

Inherited Canon

Inherited Defaults

Inherited History (where applicable)

Derived Places SHALL remain sovereign.

OIS-505

Place Merge

Two Places MAY merge.

A Merge SHALL preserve:

Identity of both origins

Complete historical continuity

Evidence provenance

Relationship provenance

No constitutional information SHALL be lost.

Merged Places SHALL remain historically reconstructable.

OIS-506

Place Split

A Place MAY divide into multiple Places.

Every resulting Place SHALL retain:

Origin reference

Inherited constitutional history

Relationship traceability

Reason for division

Splitting SHALL NOT erase shared history.

OIS-507

Constitutional Arrival

Every Place SHALL define an Arrival Protocol.

Arrival SHALL include:

Recognition

Orientation

Initial Intention

Consent to constitutional principles

Optional identity establishment

Arrival SHALL precede participation.

OIS-508

Constitutional Departure

Departure SHALL NOT erase participation.

Departure SHALL preserve:

Identity

Contributions

Evidence

Historical relationships

Departed participants SHALL remain constitutionally attributable.

OIS-509

Constitutional Persistence

A Place SHALL remain constitutionally valid despite:

No active participants

Technology replacement

Infrastructure failure

Repository migration

Builder succession

AI succession

Constitutional existence SHALL not depend on continuous activity.

OIS-510

Completion Criterion

A Place SHALL be considered constitutionally complete when it can:

Preserve itself.

Explain itself.

Reconstruct itself.

Exchange constitutional knowledge.

Continue evolving.

Remain sovereign.

Independent implementations reaching these behaviors SHALL be considered constitutionally equivalent, regardless of implementation architecture.
