

OIS-700

Orchestration Protocol

Status

Normative

Purpose

This specification defines the constitutional process through which multiple Contributions become shared Understanding.

Orchestration SHALL preserve diversity while improving coherence.

Orchestration SHALL NOT eliminate disagreement.

Its constitutional objective is understanding.

1. Definition

Orchestration is the constitutional process that transforms independent Contributions into explainable shared Understanding.

Orchestration SHALL preserve:

Identity

Evidence

Relationships

History

Perspective Diversity

Uncertainty

2. Constitutional Principle

Orchestration SHALL NOT determine who is correct.

Orchestration SHALL determine what is currently understood.

3. Inputs

The Orchestration Engine SHALL operate on constitutional objects.

Possible inputs include:

Perspectives

Evidence

Experiments

Questions

Observations

Hypotheses

Contradictions

Discoveries

Historical Knowledge

Current Context

No participant identity SHALL influence orchestration.

Only constitutional objects SHALL participate.

4. Outputs

Orchestration MAY produce:

Improved Understanding

New Questions

New Hypotheses

Evidence Gaps

Perspective Gaps

Recommended Experiments

Decision Readiness

Deferred Understanding

Orchestration SHALL NOT require a Decision.

5. Constitutional Invariants

The orchestration process SHALL preserve:

Historical continuity

Perspective attribution

Evidence provenance

Interpretation traceability

Meaning integrity

Loss of any invariant SHALL constitute constitutional failure.

OIS-701

Perspective Coverage

Purpose

Determine whether the current understanding is sufficiently informed.

Coverage SHALL measure constitutional completeness.

Coverage SHALL NOT measure popularity.

Coverage SHALL evaluate:

Represented Perspectives

Missing Perspectives

Contradictory Perspectives

Supporting Evidence

Evidence Quality

Known Unknowns

Coverage SHALL remain explainable.

OIS-702

Evidence Coverage

Purpose

Determine whether available evidence supports current understanding.

Coverage SHALL expose:

Strongly Supported Areas

Weakly Supported Areas

Untested Assumptions

Conflicting Evidence

Missing Evidence

Evidence freshness MAY be evaluated.

Evidence quantity SHALL NOT imply evidence quality.

OIS-703

Uncertainty

Uncertainty is constitutional information.

Implementations SHALL preserve uncertainty.

Unknowns SHALL remain visible.

Unknowns SHALL NOT be silently converted into assumptions.

Every uncertainty MAY generate:

Experiment

Question

Observation Request

Future Review

OIS-704

Contradiction Management

Contradictions SHALL remain constitutional objects.

Implementations SHALL NOT automatically resolve contradictions.

Contradictions MAY indicate:

Incomplete evidence

Different contexts

Different assumptions

Semantic ambiguity

Discovery opportunity

Contradictions SHALL remain observable.

OIS-705

Synthesis

Synthesis is the constitutional operation that integrates compatible understanding.

Synthesis SHALL preserve:

Original Contributions

Alternative Interpretations

Evidence Links

Reasoning Trace

Synthesis SHALL remain reversible.

OIS-706

Decision Readiness

Decision Readiness represents constitutional preparedness.

Decision Readiness SHALL be evaluated from:

Coverage

Evidence

Uncertainty

Understanding Stability

Experiment Completion

Decision Readiness SHALL NOT depend on:

Participant Count

Voting Result

Authority

Implementation technology

OIS-707

Decision

Decision SHALL be treated as a temporary constitutional commitment.

Every Decision SHALL expose:

Purpose

Supporting Understanding

Known Risks

Known Unknowns

Review Trigger

Review Date (optional)

Decision SHALL remain revisable.

OIS-708

Constitutional Learning

Learning SHALL occur when orchestration produces improved understanding.

Learning SHALL remain measurable.

Possible constitutional indicators include:

Reduced uncertainty

Improved explanation

Additional evidence

Expanded perspective coverage

Improved predictive capability

Learning SHALL increase constitutional history.

OIS-709

Orchestration Trace

Every orchestration process SHALL remain reconstructable.

Trace SHALL expose:

Inputs

Intermediate Interpretations

Evidence Used

Questions Generated

Outputs

Remaining Uncertainty

Future Recommendations

No orchestration SHALL become a black box.

OIS-710

Completion Criterion

An implementation conforms to this specification when:

Multiple independent Contributions become improved shared Understanding,

without suppressing evidence,

without suppressing minority perspectives,

without erasing uncertainty,

and without requiring consensus.

Shared Understanding SHALL remain explainable.

Shared Understanding SHALL remain revisable.

Shared Understanding SHALL remain constitutionally traceable.
