## Constitutional Axioms

### Status

Foundational

Normative

---

### Purpose

This document defines the irreducible constitutional principles of Organodynamics.

Every other specification derives its validity from these axioms.

If any later specification contradicts an axiom,

the later specification SHALL be considered invalid.

---

## Axiom 1

### Constitutional Identity

Every constitutional object possesses exactly one identity.

Identity is permanent.

Identity is never reassigned.

Identity survives representation.

Identity survives migration.

Identity survives implementation replacement.

---

## **Axiom 2**

### **Constitutional Meaning**

Meaning exists independently of representation.

Representations may change.

Meaning shall remain reconstructable.

---

## **Axiom 3**

### **Constitutional History**

Nothing constitutional ever disappears.

Objects may become:

Inactive

Superseded

Archived

Deprecated

Historical continuity shall remain preserved.

---

## **Axiom 4**

### **Constitutional Change**

Nothing constitutional changes without an Event.

Every Event becomes constitutional history.

---

## **Axiom 5**

### **Constitutional Traceability**

Every constitutional statement shall be explainable.

Explanation shall be reconstructable.

Explanation shall reference constitutional evidence.

---

## **Axiom 6**

### **Constitutional Uncertainty**

Unknowns are constitutional objects.

Unknowns shall remain visible.

Unknowns shall never silently become assumptions.

---

## **Axiom 7**

### **Constitutional Evidence**

Evidence modifies confidence.

Evidence never modifies history.

Evidence never modifies identity.

---

## **Axiom 8**

### **Constitutional Understanding**

Understanding is provisional.

Understanding is revisable.

Understanding is never absolute.

---

## **Axiom 9**

### **Constitutional Sovereignty**

Knowledge belongs to Places.

Implementations temporarily host Places.

Implementations never own Places.

---

## **Axiom 10**

### **Constitutional Replaceability**

Every implementation component is replaceable.

Meaning shall remain.

Identity shall remain.

History shall remain.

---

## **Axiom 11**

### **Constitutional Participation**

Participation improves understanding.

Participation does not establish truth.

---

## **Axiom 12**

### **Constitutional Evolution**

Evolution preserves identity.

Evolution improves explanation.

Evolution never erases history.

---

## **Derived Principle**

Every normative Organodynamics specification SHALL be derivable from one or more constitutional axioms.

If derivation cannot be demonstrated,

the specification SHALL remain non-normative.
